Docket No. 50-387  
License No. NPF-14

Attached is Licensee Event Report 50-387/98-009-00. This report describes two events in which ACTION b of Technical Specification 3.9.1 could not be complied with in order to perform required surveillances to insure operability of required plant equipment. Not being able to comply with an action statement constitutes an event which is reportable per 10CFR50.73(a)(2)(i)(B). In conjunction with the 1998 Improved Technical Specifications implementation plan for Susquehanna SES, the Improved Technical Specifications corrects the situation for the performance of the one-rod-out interlock surveillance when it is inoperable, without being in noncompliance with an ACTION statement.
