SUBJECT

Discussion of Amendment No. 5 Draft Licensing Documents

SUMMARY

At approximately 2 P.M. on June 1, Dominion Energy called Chris Allen to discuss a draft safety evaluation report which NRC staff had provided to Dominion Energy on May 15 (ML17157B307) to insure it did not contain proprietary information. Although Dominion Energy identified no proprietary information, they provided several comments which were either editorial or clarifying in nature (ML17158B215). NRC staff had also provided a draft revised license to Dominion Energy on May 15 to ensure editorial changes initiated by NRC staff were acceptable to Dominion Energy. Dominion Energy stated these editorial changes were acceptable. In addition, NRC staff had transmitted comments on the proposed technical specifications to Dominion Energy on May 22 (ML17157B353). After some discussion, Dominion Energy committed to incorporating NRC staff's comments and indicated they would make some editorial changes to Table 2.1-1 of the technical specifications independent of NRC staff's comments. After making these changes, Dominion Energy would provide updated technical specifications. The call concluded at approximately 2:45 P.M.
