 PLA-2512

Docket Nos. 50-387
 50-388

Dear Dr. Murley:

We appreciated the opportunity to meet with you and your staff on July 30 to review the Region 1 assessment of PP&L's performance over the past fifteen months. While we recognize that the SALP Board Report was generally favorable, we welcome your suggestions and will continue to seek to improve our performance in all areas.

In reviewing the reports we noted several concerns of NRC. Most of these were discussed at the July 30 meeting and we believe these discussions were mutually beneficial. Therefore, PP&L does not plan to submit any additional comments on the report. Copies of the presentations made at the July 30 meeting are attached for your information.

Very truly yours,

H. W. Keiser
 Vice President-Nuclear Operatins
