General Comment

To Whom It May Concern:

I am writing to voice my OPPOSITION to the building of a nuclear power plant on the Clinch River. In my opinion Small Modular Reactors are:

- not needed and would be more accurately coined as an experimental technology that would be Squandering More Resources.
- extremely expensive, with no actual approved reactor designs.
- extremely water-intensive, especially when compared to clean energy choices such as wind, solar and energy efficiency and conservation.
- polluting just like existing nuclear plants, SMRs produce long-lived, highly radioactive nuclear waste for which no safe management and permanent storage exists.

Thank you for your consideration.

Sincerely,
