General Comment

I strongly encourage you to abandon the plan to build the Clinch River Nuclear Reactor.

SMRs are not needed and would be more accurately coined as an experimental technology that would be Squandering More Resources.

SMRs are extremely expensive, with no actual approved reactor designs.

SMRs are extremely water-intensive, especially when compared to clean energy choices such as wind, solar and energy efficiency and conservation.

SMRs are polluting just like existing nuclear plants, SMRs produce long-lived, highly radioactive nuclear waste for which no safe management and permanent storage exists.

Building this reactor would endanger lives. I want TVA to focus on clean green renewable energy production. Thank you.

Beth Wallace
