General Comment

We absolutely do not need to continue on the disastrous course of the past by generating energy from nuclear power. Have we learned nothing from Three Mile Island, Chernobyl and (most significantly) Fukushima?

It is shameless and ignorant that we should pursue this destructive path when so many non-polluting and less expensive and proven renewable options are available to us.

Get with the program, NRC. Wake up and smell the proverbial coffee. Abandon your archaic and short sited vision of harnessing the power from the splitting atom. Join the rest of the natural cycles of the planet and focus on utilizing solar, wind, hydro, wave, magnetic and other more visionary forms of energy production.
