Abnormal Rad Levels / Radiological Effluents

Radiological Effluents

GENERAL EMERGENCY

RG1 1 2 3 4 5 D

Release of gaseous radioactivity resulting in offsite dose greater than 1,000 mRem TEDE or 5,000 mRem thyroid CDE.

Emergency Action Level (EAL):

Notes:

- The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.
- If an ongoing release is detected and the release start time is unknown, assume that the release duration has exceeded 15 minutes.
- Classification based on effluent monitor readings assumes that a release path to the environment is established. If the effluent flow past an effluent monitor is known to have stopped due to actions to isolate the release path, then the effluent monitor reading is no longer valid for classification purposes.
- The pre-calculated effluent monitor values presented in EAL #1(Table R1) should be used for emergency classification assessments until the results from a dose assessment using actual meteorology are available.

1. Readings on **ANY** Table R1 Effluent Monitor **> Table R1 value** for **≥ 15 minutes**.
   OR
2. Dose assessment Using actual meteorology indicates doses at or beyond the site boundary of **EITHER**:
   a. **> 1000 mRem TEDE**
   OR
   b. **> 5000 mRem CDE Thyroid**
   OR
3. Field survey results at or beyond the site boundary indicate **EITHER**:
   a. Gamma (closed window) dose rates **> 1000 mR/hr** are expected to continue for **≥ 60 minutes**.
   OR
   b. Analyses of field survey samples indicate **> 5000 mRem CDE Thyroid** for **60 minutes** of inhalation.

SITE AREA EMERGENCY

RS1 1 2 3 4 5 D

Release of gaseous radioactivity resulting in offsite dose greater than 100 mRem TEDE or 500 mRem thyroid CDE.

Emergency Action Level (EAL):

Notes:

- The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.
- If an ongoing release is detected and the release start time is unknown, assume that the release duration has exceeded 15 minutes.
- Classification based on effluent monitor readings assumes that a release path to the environment is established. If the effluent flow past an effluent monitor is known to have stopped due to actions to isolate the release path, then the effluent monitor reading is no longer valid for classification purposes.
- The pre-calculated effluent monitor values presented in EAL #1 (Table R1) should be used for emergency classification assessments until the results from a dose assessment using actual meteorology are available.

1. Readings on **ANY** Table R1 Effluent Monitor **> Table R1 value** for **≥ 15 minutes**.
   OR
2. Dose assessment using actual meteorology indicates doses at or beyond the site boundary of **EITHER**:
   a. **> 100 mRem TEDE**
   OR
   b. **> 500 mRem CDE Thyroid**
   OR
3. Field survey results at or beyond the site boundary indicate **EITHER**:
   a. Gamma (closed window) dose rates **> 100 mR/hr** are expected to continue for **≥ 60 minutes**.
   OR
   b. Analyses of field survey samples indicate **> 500 mRem CDE Thyroid** for **60 minutes** of inhalation.

ALERT

RA1 1 2 3 4 5 D

Release of gaseous or liquid radioactivity resulting in offsite dose greater than 10 mrem TEDE or 50 mrem thyroid CDE.

Emergency Action Level (EAL):

Notes:

- The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.
- If an ongoing release is detected and the release start time is unknown, assume that the release duration has exceeded 15 minutes.
- Classification based on effluent monitor readings assumes that a release path to the environment is established. If the effluent flow past an effluent monitor is known to have stopped due to actions to isolate the release path, then the effluent monitor reading is no longer valid for classification purposes.
- The pre-calculated effluent monitor values presented in EAL #1 (Table R1) should be used for emergency classification assessments until the results from a dose assessment using actual meteorology are available.

1. Readings on **ANY** Table R1 Effluent Monitor **> Table R1 value** for **≥ 15 minutes**.
   OR
2. Dose assessment using actual meteorology indicates doses at or beyond the site boundary of **EITHER**:
   a. **> 10 mRem TEDE**
   OR
   b. **> 50 mRem CDE Thyroid**
   OR
3. Analysis of a liquid effluent sample indicates a concentration or release rate that would result in doses greater than **EITHER** of the following at or beyond the site boundary.
   a. **10 mRem** TEDE for **60 minutes** of exposure.
   OR
   b. **50 mRem** CDE Thyroid for **60 minutes** of exposure.
   OR
4. Field survey results at or beyond the site boundary indicate **EITHER**:
   a. Gamma (closed window) dose rates **> 10 mR/hr** are expected to continue for **≥ 60 minutes**.
   OR
   b. Analyses of field survey samples indicate **> 50 mRem CDE Thyroid** for **60 minutes** of inhalation.

UNUSUAL EVENT

RU1 1 2 3 4 5 D

Release of gaseous or liquid radioactivity greater than 2 times the ODCM limits for 60 minutes or longer.

Emergency Action Level (EAL):

Notes:

- The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.
- If an ongoing release is detected and the release start time is unknown, assume that the release duration has exceeded 60 minutes.
- Classification based on effluent monitor readings assumes that a release path to the environment is established. If the effluent flow past an effluent monitor is known to have stopped due to actions to isolate the release path, then the effluent monitor reading is no longer valid for classification purposes.

1. Reading on the Liquid Radwaste Effluent Monitor (LWS-RE206) **> 2 times DRMS High (red)** established by a current radioactive release discharge permit for **≥ 60 minutes**.
   OR
2. Readings on **ANY** Table R1 Effluent Monitor **> Table R1 value** for **≥ 60 minutes**.
   OR
3. Confirmed sample analyses for gaseous or liquid releases indicate concentrations or release rates **> 2 times ODCM Limit** with a release duration of **≥ 60 minutes**.

Modes: 1 – Power Operation 2 – Startup 3 – Hot Shutdown 4 – Cold Shutdown 5 – Refueling D – Defueled

Table R1 Effluent Monitor Thresholds

Effluent Monitor	General Emergency	Site Area Emergency	Alert	Unusual Event
Radwaste/RB Vent Effluent (2RMS-PNL180C)	4.80 E+07 µCi/sec	4.80 E+06 µCi/sec	4.80 E+05 µCi/sec	1.69 E+05 µCi/sec
Main Stack Effuent (2RMS-PNL170C)	1.02 E+11 µCi/sec	1.02 E+10 µCi/sec	1.02 E+09 µCi/sec	7.12 E+05 µCi/sec

Abnormal Rad Levels / Radiological Effluents

GENERAL EMERGENCY

RG2 1 2 3 4 5 D

Spent fuel pool level cannot be restored to at least 330 feet for 60 minutes or longer.

Emergency Action Levels (EAL):

Note: The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.

Spent fuel pool level cannot be restored to at least **330 feet** as indicated on 2SFC-LI413A or B for **≥ 60 minutes**.

Table R3
Areas Requiring Continuous Occupancy

- Main Control Room
- Central Alarm Station – (by survey)

SITE AREA EMERGENCY

RS2 1 2 3 4 5 D

Spent fuel pool level at 330 feet.

Emergency Action Level (EAL):

Lowering of spent fuel pool level to **330 feet** as indicated on 2SFC-LI413A or B.

261’ Div 2 Switchgear Room (RHR A & B)	

ALERT

RA2 1 2 3 4 5 D

Significant lowering of water level above, or damage to, irradiated fuel.

Emergency Action Level (EAL):

1. Uncovery of irradiated fuel in the REFUELING PATHWAY.

   OR

2. Damage to irradiated fuel resulting in a release of radioactivity from the fuel as indicated by **ANY** Table R2 Radiation Monitor Alarm.

   OR

3. Lowering of spent fuel pool level to **340 feet** as indicated on 2SFC-LI413A or B.

RA3 1 2 3 4 5 D

Radiation levels that impede access to equipment necessary for normal plant operations, cooldown or shutdown.

Emergency Action Level (EAL):

Note: If the equipment in the room or area listed in Table R4 was already inoperable, or out of service, before the event occurred, then no emergency classification is warranted.

1. Dose rate **> 15 mR/hr** in **ANY** of the areas in Table R3.

   OR

2. UNPLANNED event results in radiation levels that prohibit or significantly impede access to **ANY** of the areas in Table R4.

UNUSUAL EVENT

RU2 1 2 3 4 5 D

UNPLANNED loss of water level above irradiated fuel.

Emergency Action Level (EAL):

1. a. UNPLANNED water level drop in the REFUELING PATHWAY as indicated by **ANY** of the following:

   - Inability to restore and maintain Spent Fuel Pool water level **> low water level alarm.**

     OR

   - Indication or report of a drop in water level in the REFUELING PATHWAY.

   AND

   b. UNPLANNED Area Radiation Monitor reading rise on **ANY** Table R2 radiation monitor.

RU3 1 2 3

Reactor coolant activity greater than Technical Specification allowable limits.

Emergency Action Level (EAL):

1 Offgas radiation DRMS high (red) alarm for **≥ 15 minutes**.

OR

2. Specific coolant activity **> 4.0 µCi/gm** Dose Equivalent I-131.

Modes: 1 – Power Operation 2 – Startup 3 – Hot Shutdown 4 – Cold Shutdown 5 – Refueling D – Defueled

GENERAL EMERGENCY	SITE AREA EMERGENCY	ALERT

GENERAL EMERGENCY	SITE AREA EMERGENCY	ALERT	UNUSUAL EVENT
Hazards and Other conditions Affecting Plant Safety			
Emergency Director Judgment **HG7** 1 2 3 4 5 D Other conditions exist which in the judgment of the Emergency Director warrant declaration of a GENERAL EMERGENCY. **Emergency Action Level (EAL):** Other conditions exist which in the judgment of the Emergency Director indicate that events are in progress or have occurred which involve actual or IMMINENT substantial core degradation or melting with potential for loss of containment integrity or HOSTILE ACTION that results in an actual loss of physical control of the facility. Releases can be reasonably expected to exceed EPA Protective Action Guideline exposure levels offsite for more than the immediate site area.	**HS7** 1 2 3 4 5 D Other conditions exist which in the judgment of the Emergency Director warrant declaration of a SITE AREA EMERGENCY. **Emergency Action Level (EAL):** Other conditions exist which in the judgment of the Emergency Director indicate that events are in progress or have occurred which involve actual or likely major failures of plant functions needed for protection of the public or HOSTILE ACTION that results in intentional damage or malicious acts, (1) toward site personnel or equipment that could lead to the likely failure of or, (2) that prevent effective access to equipment needed for the protection of the public. Any releases are not expected to result in exposure levels which exceed EPA Protective Action Guideline exposure levels beyond the site boundary.	**HA7** 1 2 3 4 5 D Other conditions exist which in the judgment of the Emergency Director warrant declaration of an ALERT. **Emergency Action Level (EAL):** Other conditions exist which, in the judgment of the Emergency Director, indicate that events are in progress or have occurred which involve an actual or potential substantial degradation of the level of safety of the plant or a security event that involves probable life threatening risk to site personnel or damage to site equipment because of HOSTILE ACTION. Any releases are expected to be limited to small fractions of the EPA Protective Action Guideline exposure levels.	**HU7** 1 2 3 4 5 D Other conditions exist which in the judgment of the Emergency Director warrant declaration of an UNUSUAL EVENT. **Emergency Action Level (EAL):** Other conditions exist which in the judgment of the Emergency Director indicate that events are in progress or have occurred which indicate a potential degradation of the level of safety of the plant or indicate a security threat to facility protection has been initiated. No releases of radioactive material requiring offsite response or monitoring are expected unless further degradation of safety systems occurs.

Abnormal Rad Levels / Radiological Effluents

Radiological Effluents

GENERAL EMERGENCY

RG1 1 2 3 4 5 D

Release of gaseous radioactivity resulting in offsite dose greater than 1,000 mRem TEDE or 5,000 mRem thyroid CDE.

Emergency Action Level (EAL):

Notes:

- The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.
- If an ongoing release is detected and the release start time is unknown, assume that the release duration has exceeded 15 minutes.
- Classification based on effluent monitor readings assumes that a release path to the environment is established. If the effluent flow past an effluent monitor is known to have stopped due to actions to isolate the release path, then the effluent monitor reading is no longer valid for classification purposes.
- The pre-calculated effluent monitor values presented in EAL #1(Table R1) should be used for emergency classification assessments until the results from a dose assessment using actual meteorology are available.

1. Readings on **ANY** Table R1 Effluent Monitor **> Table R1 value** for **≥ 15 minutes**.
   OR
2. Dose assessment Using actual meteorology indicates doses at or beyond the site boundary of **EITHER**:
   a. **> 1000 mRem TEDE**
   OR
   b. **> 5000 mRem CDE Thyroid**
   OR
3. Field survey results at or beyond the site boundary indicate **EITHER**:
   a. Gamma (closed window) dose rates **> 1000 mR/hr** are expected to continue for **≥ 60 minutes**.
   OR
   b. Analyses of field survey samples indicate **> 5000 mRem CDE Thyroid** for **60 minutes** of inhalation.

SITE AREA EMERGENCY

RS1 1 2 3 4 5 D

Release of gaseous radioactivity resulting in offsite dose greater than 100 mRem TEDE or 500 mRem thyroid CDE.

Emergency Action Level (EAL):

Notes:

- The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.
- If an ongoing release is detected and the release start time is unknown, assume that the release duration has exceeded 15 minutes.
- Classification based on effluent monitor readings assumes that a release path to the environment is established. If the effluent flow past an effluent monitor is known to have stopped due to actions to isolate the release path, then the effluent monitor reading is no longer valid for classification purposes.
- The pre-calculated effluent monitor values presented in EAL #1(Table R1) should be used for emergency classification assessments until the results from a dose assessment using actual meteorology are available.

1. Readings on **ANY** Table R1 Effluent Monitor **> Table R1 value** for **≥ 15 minutes**.
   OR
2. Dose assessment using actual meteorology indicates doses at or beyond the site boundary of **EITHER**:
   a. **> 100 mRem TEDE**
   OR
   b. **> 500 mRem CDE Thyroid**
   OR
3. Field survey results at or beyond the site boundary indicate **EITHER**:
   a. Gamma (closed window) dose rates **> 100 mR/hr** are expected to continue for **≥ 60 minutes**.
   OR
   b. Analyses of field survey samples indicate **> 500 mRem CDE Thyroid** for **60 minutes** of inhalation.

ALERT

RA1 1 2 3 4 5 D

Release of gaseous or liquid radioactivity resulting in offsite dose greater than 10 mrem TEDE or 50 mrem thyroid CDE.

Emergency Action Level (EAL):

Notes:

- The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.
- If an ongoing release is detected and the release start time is unknown, assume that the release duration has exceeded 15 minutes.
- Classification based on effluent monitor readings assumes that a release path to the environment is established. If the effluent flow past an effluent monitor is known to have stopped due to actions to isolate the release path, then the effluent monitor reading is no longer valid for classification purposes.
- The pre-calculated effluent monitor values presented in EAL #1(Table R1) should be used for emergency classification assessments until the results from a dose assessment using actual meteorology are available.

1. Readings on **ANY** Table R1 Effluent Monitor **> Table R1 value** for **≥ 15 minutes**.
   OR
2. Dose assessment using actual meteorology indicates doses at or beyond the site boundary of **EITHER**:
   a. **> 10 mRem TEDE**
   OR
   b. **> 50 mRem CDE Thyroid**
   OR
3. Analysis of a liquid effluent sample indicates a concentration or release rate that would result in doses greater than **EITHER** of the following at or beyond the site boundary
   a. **10 mRem** TEDE for **60 minutes** of exposure
   OR
   b. **50 mRem** CDE Thyroid for **60 minutes** of exposure
   OR
4. Field survey results at or beyond the site boundary indicate **EITHER**:
   a. Gamma (closed window) dose rates **> 10 mR/hr** are expected to continue for **≥ 60 minutes**.
   OR
   b. Analyses of field survey samples indicate **> 50 mRem CDE Thyroid** for **60 minutes** of inhalation.

UNUSUAL EVENT

RU1 1 2 3 4 5 D

Release of gaseous or liquid radioactivity greater than 2 times the ODCM limits for 60 minutes or longer.

Emergency Action Level (EAL):

Notes:

- The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.
- If an ongoing release is detected and the release start time is unknown, assume that the release duration has exceeded 60 minutes.
- Classification based on effluent monitor readings assumes that a release path to the environment is established. If the effluent flow past an effluent monitor is known to have stopped due to actions to isolate the release path, then the effluent monitor reading is no longer valid for classification purposes.

1. Reading on the Liquid Radwaste Effluent Monitor (LWS-RE206) **> 2 times DRMS High (red)** established by a current radioactive release discharge permit for **≥ 60 minutes**.
   OR
2. Readings on **ANY** Table R1 Effluent Monitor **> Table R1 value** for **≥ 60 minutes**.
   OR
3. Confirmed sample analyses for gaseous or liquid releases indicate concentrations or release rates **> 2 times ODCM Limit** with a release duration of **≥ 60 minutes**.

Modes: 1 – Power Operation 2 – Startup 3 – Hot Shutdown 4 – Cold Shutdown 5 – Refueling D – Defueled

Table R1 Effluent Monitor Thresholds

Effluent Monitor	General Emergency	Site Area Emergency	Alert	Unusual Event
Radwaste/RB Vent Effluent (2RMS-PNL180C)	4.80 E+07 µCi/sec	4.80 E+06 µCi/sec	4.80 E+05 µCi/sec	1.69 E+05 µCi/sec
Main Stack Effuent (2RMS-PNL170C)	1.02 E+11 µCi/sec	1.02 E+10 µCi/sec	1.02 E+09 µCi/sec	7.12 E+05 µCi/sec

Abnormal Rad Levels / Radiological Effluents

Radiological Effluents

GENERAL EMERGENCY

RG2 1 2 3 4 5 D

Spent fuel pool level cannot be restored to at least 330 feet for 60 minutes or longer.

Emergency Action Levels (EAL):

Note: The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.

Spent fuel pool level cannot be restored to at least **330 feet** as indicated on 2SFC-LI413A or B for **≥ 60 minutes**.

Table R3
Areas Requiring Continuous Occupancy

- Main Control Room
- Central Alarm Station – (by survey)

SITE AREA EMERGENCY

RS2 1 2 3 4 5 D

Spent fuel pool level at 330 feet.

Emergency Action Level (EAL):

Lowering of spent fuel pool level to **330 feet** as indicated on 2SFC-LI413A or B.

Table R2 Refuel Floor Radiation Monitors

- 2RMS-RE111
- 2RMS-RE112
- 2RMS-RE113

Table R4
Areas with Entry Related Mode Applicability

Area	Entry Related Mode Applicability
Reactor Building	Mode 3, 4, and 5
175’ RHS A Pump Room (RHR A)	
196’ Az 56 Deg (RHR A)	
175’ RHS B Pump Room (RHR A & B)	
Control Building	
261’ Div 1 Switchgear Room (RHR A & B)	
261’ Div 2 Switchgear Room (RHR A & B)	

ALERT

RA2 1 2 3 4 5 D

Significant lowering of water level above, or damage to, irradiated fuel.

Emergency Action Level (EAL):

1. Uncovery of irradiated fuel in the REFUELING PATHWAY.

   OR

2. Damage to irradiated fuel resulting in a release of radioactivity from the fuel as indicated by **ANY** Table R2 Radiation Monitor Alarm.

   OR

3. Lowering of spent fuel pool level to **340 feet** as indicated on 2SFC-LI413A or B.

RA3 1 2 3 4 5 D

Radiation levels that impede access to equipment necessary for normal plant operations, cooldown or shutdown.

Emergency Action Level (EAL):

Note: If the equipment in the listed Table R4 room or area was already inoperable, or out of service, before the event occurred, then no emergency classification is warranted

1. Dose rate **> 15 mR/hr** in **ANY** of the areas in Table R3.

   OR

2. UNPLANNED event results in radiation levels that prohibit or significantly impede access to **ANY** of the areas in Table R4.

UNUSUAL EVENT

RU2 1 2 3 4 5 D

UNPLANNED loss of water level above irradiated fuel.

Emergency Action Level (EAL):

1. a. UNPLANNED water level drop in the REFUELING PATHWAY as indicated by **ANY** of the following:

   - Inability to restore and maintain Spent Fuel Pool water level **> low water level alarm.**

     OR

   - Indication or report of a drop in water level in the REFUELING PATHWAY.

   AND

   b. UNPLANNED Area Radiation Monitor reading rise on **ANY** Table R2 radiation monitor.

Modes: 1 – Power Operation 2 – Startup 3 – Hot Shutdown 4 – Cold Shutdown 5 – Refueling D – Defueled

GENERAL EMERGENCY	SITE AREA EMERGENCY	ALERT	UNUSUAL EVENT
Cold Shutdown / Refueling System Malfunctions			
Loss of AC Power		**CA1** 4 5 D Loss of all offsite and onsite AC power to emergency buses for 15 minutes or longer. **Emergency Action Level (EAL):** **Note:** The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded. 1. Loss of **ALL** offsite and onsite AC power to 4.16 kV emergency buses 2ENS*SWG101 and 2ENS*SWG103. **AND** 2. Failure to restore power to at least one 4.16 kV emergency bus 2ENS*SWG101 or 2ENS*SWG103 in **< 15 minutes** from the time of loss of both offsite and onsite AC power.	**CU1** 4 5 D Loss of all but one AC power source to emergency buses for 15 minutes or longer. **Emergency Action Level (EAL):** **Note:** The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded. 1. AC power capability to 4.16 kV emergency buses 2ENS*SWG101 and 2ENS*SWG103 reduced to only one of the following power sources for **≥ 15 minutes.** • Reserve Transformer A • Reserve Transformer B • Aux Boiler Transformer • 2EGS*EG1 • 2EGS*EG3 • 2EGS*EG2 **AND** 2. **ANY** additional single power source failure will result in a loss of **ALL** AC power to SAFETY SYSTEMS.
Safety System		**CA2** 4 5 Hazardous event affecting SAFETY SYSTEM required for the current operating mode. **Emergency Action Level (EAL):** **Note:** If it is determined that the conditions of CA2 are not met then assess the event via HU3, HU4, or HU6 1. The occurrence of **ANY** of the following hazardous events: • Seismic event (earthquake) • Internal or external flooding event • High winds or tornado strike • FIRE • EXPLOSION • Other events with similar hazard characteristics as determined by the Shift Manager **AND** 2. **EITHER** of the following: a. Event damage has caused indications of degraded performance in at least one train of a SAFETY SYSTEM required by Technical Specifications for the current operating mode. **OR** b. The event has caused VISIBLE DAMAGE to a SAFETY SYSTEM component or structure required by Technical Specifications for the current operating mode.	

Modes: 1 – Power Operation 2 – Startup 3 – Hot Shutdown 4 – Cold Shutdown 5 – Refueling D – Defueled

	GENERAL EMERGENCY	SITE AREA EMERGENCY	ALERT	UNUSUAL EVENT

DC Power				**CU3** 4 5 Loss of Vital DC power for 15 minutes or longer. **Emergency Action Level (EAL):** **Note:** The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded. Voltage is **< 108 VDC** on required Vital DC buses 2BYS*SWG002A and 2BYS*SWG002B for **≥ 15 minutes**.
Communications			**Table C1 Communication Capabilities** System / Onsite / Offsite / NRC Gaitronics: X Hand Held Portable Radio (Station Radio): X PBX (Conventional Telephone lines): X / X / X Control Room installed satellite phone (non portable): X / X / X ENS: X / X RECS: X	**CU4** 4 5 D Loss of all onsite or offsite communication capabilities. **Emergency Action Level (EAL):** 1. Loss of **ALL** Table C1 onsite communication capabilities affecting the ability to perform routine operations. **OR** 2. Loss of **ALL** Table C1 offsite communication capabilities affecting the ability to perform offsite notifications. **OR** 3. Loss of **ALL** Table C1 NRC communication capabilities affecting the ability to perform NRC notifications.
Heat Sink		**Table C2 RCS Heat-up Duration Thresholds** RCS Status / Containment Closure Status / Heat-up Duration Intact / Not Applicable / 60 minutes* Not Intact / Established / 20 minutes* Not Intact / Not Established / 0 minutes * If an RCS heat removal system is in operation within this time frame and RCS temperature is being reduced, then EAL #1 is **not** applicable.	**CA5** 4 5 Inability to maintain plant in cold shutdown. **Emergency Action Levels (EAL):** **Note:** • The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded. • A momentary UNPLANNED excursion above the Technical Specification cold shutdown temperature limit when heat removal function is available does not warrant classification. 1. UNPLANNED rise in RCS temperature **> 200 ºF** for **> Table C2 duration**. **OR** 2. UNPLANNED RCS pressure rise **> 10 psig** as a result of temperature rise	**CU5** 4 5 UNPLANNED rise in RCS temperature. **Emergency Action Levels (EAL):** **Note:** • The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded. • A momentary UNPLANNED excursion above the Technical Specification cold shutdown temperature limit when heat removal function is available does not warrant classification. 1. UNPLANNED rise in RCS temperature **> 200 ºF.** **OR** 2. Loss of the following for **≥ 15 minutes.** • **ALL** RCS temperature indications **AND** • **ALL** RPV water level indications

Cold Shutdown / Refueling System Malfunctions

RCS Leakage / Inventory

GENERAL EMERGENCY

CG6 4 5

Loss of RPV inventory affecting fuel clad integrity with containment challenged.

Emergency Action Level (EAL):

Note: The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.

1 a. RPV water level **< -14 inches** for **≥ 30 minutes.**

AND

b. **Any** Table C5 Containment Challenge Indication.

OR

2. a. RPV water level **cannot** be monitored for **≥ 30 minutes.**

AND

b. Core uncovery is indicated by **ANY** of the following:

- Table C4 indication of a sufficient magnitude to indicate core uncovery.

  OR

- **ANY** Table C3 Refuel floor Rad monitor **≥ 3 R/hr.**

AND

c. **ANY** Table C5 Containment Challenge Indication.

SITE AREA EMERGENCY

CS6 4 5

Loss of RPV inventory affecting core decay heat removal capabilities.

Emergency Action Level (EAL):

Note: The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.

1. With CONTAINMENT CLOSURE **not** established, RPV water level **< 17.8 inches.**

   OR

2. With CONTAINMENT CLOSURE established, RPV water level **< - 14 inches.**

   OR

3. a. RPV water level **cannot** be monitored for **≥ 30 minutes.**

   AND

   b. Core uncovery is indicated by **ANY** of the following:

   - Table C4 indication of a sufficient magnitude to indicate core uncovery.

     OR

   - **ANY** Table C3 Refuel Floor Rad monitor **≥ 3 R/hr.**

ALERT

CA6 4 5

Loss of RPV inventory.

Emergency Action Level (EAL):

Note: The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.

1. Loss of RPV inventory as indicated by level **< 108.8 inches.**

   OR

2. a. RPV water level **cannot** be monitored for **≥ 15 minutes**.

   AND

   b. Loss of RPV inventory per Table C4 indications.

UNUSUAL EVENT

CU6 4 5

UNPLANNED loss of RP inventory for 15 minutes or longer.

Emergency Action Level (EAL):

Note: The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded.

1. UNPLANNED loss of reactor coolant results in the inability to restore and maintain RPV level to above the **procedurally established lower limit** for **≥ 15 minutes**.

   OR

2. a. RPV water level **cannot** be monitored.

   AND

   b. Loss of RPV inventory per Table C4 indications.

Table C3 Refuel Floor ARMs

- 2RMS-RE111
- 2RMS-RE112
- 2RMS-RE113
- 2RMS-RE114

Table C4 Indications of RCS Leakage

- UNPLANNED Drywell equipment drain sump level rise*
- UNPLANNED Drywell floor drain sump level rise*
- UNPLANNED Reactor Building equipment sump level rise*
- UNPLANNED Reactor Building floor drain sump level rise*
- UNPLANNED Suppression Pool level rise*
- UNPLANNED vessel make up rate rise*
- Observation of leakage or inventory loss

*Rise in level is attributed to a loss of RPV inventory

Table C5 Containment Challenge Indications

- Primary Containment Hydrogen Concentration **≥ 6%** and Oxygen **≥ 5%**
- UNPLANNED rise in containment pressure
- CONTAINMENT CLOSURE **not** established*
- RB area radiation **> 8.00 E+03 mR/hr**

* if CONTAINMENT CLOSURE is re-established prior to exceeding the 30-minute core uncovery time limit, then escalation to a General Emergency is **not** required.

Modes: 1 – Power Operation 2 – Startup 3 – Hot Shutdown 4 – Cold Shutdown 5 – Refueling D – Defueled

GENERAL EMERGENCY	SITE AREA EMERGENCY	ALERT	UNUSUAL EVENT
Hazards and Other conditions Affecting Plant Safety			
Hostile Action	**HS1** 1 2 3 4 5 D HOSTILE ACTION within the PROTECTED AREA. **Emergency Action Level (EAL):** A notification from the Security Force that a HOSTILE ACTION is occurring or has occurred within the PROTECTED AREA.	**HA1** 1 2 3 4 5 D HOSTILE ACTION within the OWNER CONTROLLED AREA or airborne attack threat within 30 minutes. **Emergency Action Level (EAL):** 1. A validated notification from NRC of an aircraft attack threat **< 30 minutes** from the site. **OR** 2. Notification by the Security Force that a HOSTILE ACTION is occurring or has occurred within the OWNER CONTROLLED AREA.	**HU1** 1 2 3 4 5 D Confirmed SECURITY CONDITION or threat. **Emergency Action Level (EAL):** 1. Notification of a credible security threat directed at the site as determined per SY-AA-101-132, Security Assessment and Response to Unusual Activities. **OR** 2. A validated notification from the NRC providing information of an aircraft threat. **OR** 3. Notification by the Security Force of a SECURITY CONDITION that does **not** involve a HOSTILE ACTION.
Transfer of Plant Control **Table H1 Safety Functions** • Reactivity Control (ability to shutdown the reactor and keep it shutdown) • RPV Water Level (ability to cool the core) • RCS Heat Removal (ability to maintain a heatsink)	**HS2** 1 2 3 4 5 D Inability to control a key safety function from outside the Control Room. **Emergency Action Level (EAL):** **Note:** The Emergency Director should declare the event promptly upon determining that the applicable time has been exceeded, or will likely be exceeded. 1. A Control Room evacuation has resulted in plant control being transferred from the Control Room to alternate locations per N2-SOP-78, Control Room Evacuation. **AND** 2. Control of **ANY** Table H1 key safety function is **not** reestablished in **< 15 minutes**.	**HA2** 1 2 3 4 5 D Control Room evacuation resulting in transfer of plant control to alternate locations. **Emergency Action Level (EAL):** A Control Room evacuation has resulted in plant control being transferred from the Control Room to alternate locations per N2-SOP-78, Control Room Evacuation.

GENERAL EMERGENCY	SITE AREA EMERGENCY	ALERT	UNUSUAL EVENT
Hazards and Other conditions Affecting Plant Safety			
Emergency Director Judgment **HG7** 1 2 3 4 5 D Other conditions exist which in the judgment of the Emergency Director warrant declaration of a GENERAL EMERGENCY. **Emergency Action Level (EAL):** Other conditions exist which in the judgment of the Emergency Director indicate that events are in progress or have occurred which involve actual or IMMINENT substantial core degradation or melting with potential for loss of containment integrity or HOSTILE ACTION that results in an actual loss of physical control of the facility. Releases can be reasonably expected to exceed EPA Protective Action Guideline exposure levels offsite for more than the immediate site area.	**HS7** 1 2 3 4 5 D Other conditions exist which in the judgment of the Emergency Director warrant declaration of a SITE AREA EMERGENCY. **Emergency Action Level (EAL):** Other conditions exist which in the judgment of the Emergency Director indicate that events are in progress or have occurred which involve actual or likely major failures of plant functions needed for protection of the public or HOSTILE ACTION that results in intentional damage or malicious acts, (1) toward site personnel or equipment that could lead to the likely failure of or, (2) that prevent effective access to equipment needed for the protection of the public. Any releases are not expected to result in exposure levels which exceed EPA Protective Action Guideline exposure levels beyond the site boundary.	**HA7** 1 2 3 4 5 D Other conditions exist which in the judgment of the Emergency Director warrant declaration of an ALERT. **Emergency Action Level (EAL):** Other conditions exist which, in the judgment of the Emergency Director, indicate that events are in progress or have occurred which involve an actual or potential substantial degradation of the level of safety of the plant or a security event that involves probable life threatening risk to site personnel or damage to site equipment because of HOSTILE ACTION. Any releases are expected to be limited to small fractions of the EPA Protective Action Guideline exposure levels.	**HU7** 1 2 3 4 5 D Other conditions exist which in the judgment of the Emergency Director warrant declaration of an UNUSUAL EVENT. **Emergency Action Level (EAL):** Other conditions exist which in the judgment of the Emergency Director indicate that events are in progress or have occurred which indicate a potential degradation of the level of safety of the plant or indicate a security threat to facility protection has been initiated. No releases of radioactive material requiring offsite response or monitoring are expected unless further degradation of safety systems occurs.

Modes: 1 – Power Operation 2 – Startup 3 – Hot Shutdown 4 – Cold Shutdown 5 – Refueling D – Defueled

GENERAL EMERGENCY	SITE AREA EMERGENCY	ALERT	UNUSUAL EVENT
ISFSI Malfunction			
ISFSI			**E-HU1** 1 2 3 4 5 D Damage to a loaded cask CONFINEMENT BOUNDARY. **Emergency Action Level (EAL):** Damage to a loaded cask CONFINEMENT BOUNDARY as indicated by an on-contact radiation reading: For 61BT DSC: • **> 800 mrem/hr** 3 feet from the HSM surface **OR** • **> 200 mrem/hr** outside the HSM door on centerline of DSC **OR** • **> 40 mrem/hr** end of shield wall exterior For 61BTH DSC: • **> 1400 mrem/hr** on the HSM or HSM-H front surface **OR** • **> 200 mrem/hr** on the HSM or HSM-H door centerline **OR** • **> 40 mrem/hr** on the end shield wall exterior

Modes: 1 – Power Operation 2 – Startup 3 – Hot Shutdown 4 – Cold Shutdown 5 – Refueling D - Defueled
