General Comment

please use critical thinking...quit this line of thought, please....look at possible negative impacts to the environment versus other energy sources such as wind hydro and solar....ty

SMRs are not needed and would be more accurately coined as an experimental technology that would be Squandering More Resources.
SMRs are extremely expensive, with no actual approved reactor designs.
SMRs are extremely water-intensive, especially when compared to clean energy choices such as wind, solar and energy efficiency and conservation.
SMRs are polluting just like existing nuclear plants, SMRs produce long-lived, highly radioactive nuclear waste for which no safe management and permanent storage exists.
