Allentown, Pennsylvania 18101

SUBJECT: NRC INSPECTION REPORT 50-387/99-08 AND 50-388/99-08
INDEPENDENT SPENT FUEL STORAGE INSTALLATION DRY RUN AND
PREPARATIONS

Dear Mr. Byram:

On September 2, 1999, the NRC completed an inspection at your Susquehanna Steam Electric Station (SSES) Unit 1 & 2 reactor facilities on the Independent Spent Fuel Storage Installation (ISFSI) Dry Run and related preparations to move spent fuel from the spent fuel pool to the dry storage area. The enclosed report documents the results of the inspection of ISFSI activities by specialist and resident inspectors during the period of July 6, 1999, until the exit meeting on September 2, 1999. The inspectors discussed the findings of this inspection with Mr. R. Saunders, Vice President Nuclear Operations, and others of your staff, at an interim exit meeting on July 15, 1999 and at the exit meeting.

We concluded that your staff properly demonstrated the equipment, procedures, and training of the ISFSI work team members. Also, when your staff identified issues or items for improvement during the dry run exercises, they were appropriately addressed.

Sincerely,

ORIGINAL SIGNED BY:

William H. Ruland, Chief
Engineering Support Branch
Division of Reactor Safety
