**SUSQUEHANNA STEAM ELECTRIC STATION  
REVISED OCCUPATIONAL RADIATION  
EXPOSURE REPORTS  
PLA-5115**

Docket Nos. 50-387  
and 50-388

The purpose of this letter is to correct an administrative error that resulted in three previously submitted Occupational Radiation Exposure Reports (NRC Form 5) being inaccurate. The three revised Occupational Radiation Exposure Reports (attached) were for exposures received by individuals in calendar year 1998. The revised reports incorporate doses received by these individuals that resulted from a discrete radioactive particle (two individuals), and the misassignment of extremity doses in the dose tracking system (one individual). These doses were captured on personnel contamination reports (PCR's) but were inadvertently omitted from their annual dose. To assure that all dose assessments from PCR's are included in future determinations of annual doses, improved administrative controls have been established. No Susquehanna SES administrative dose levels or NRC dose limits were exceeded as a result of the additions to the occupational exposure records. The revised NRC Form 5 reports were sent to the affected individuals.

Sincerely,

  
R. G. Byram
