Tectonic Engineering & Surveying Consultants P.C.  
License No. 06-31339-01  
Docket No. 030-37849  
Control No. 594717

Mr. Scala

In order to continue the review of your application to amend your NRC license, we need additional information. If you have any questions, please contact me (610-337-5089).

In your letter dated June 7, 2017, you submitted numerous photos of door locks and a cable that will be used to secure the portable gauges at your proposed new locations of storage. Please confirm that you will use a minimum of two independent physical controls that form tangible barriers when storing portable gauges at 1229 Albany Avenue, Hartford, CT and 1209 Main Street, Coventry CT.

Please respond in writing with a signed and dated letter. Please submit the signed response document as an attachment to an e-mail. Please be sure to include the Control No. 594717 on your response. We would appreciate a response within 10 days in order to expedite review of the license amendment request.

Thank you for your cooperation.
