<p>3. DOCKET NUMBER(S) 03011906</p>	<p>4. LICENSE NUMBER(S) 12-16941-01</p>	<p>5. DATE(S) OF INSPECTION <i>Aug. 24, 2016</i></p>

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s) and corrective action(s):

- 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with the NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11. (Violations and Corrective Actions)

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

 Field Office Inspection 153 Williams Highway, Parkersburg, WV
 Temporary Job Site Inspection

PROGRAM SCOPE

This was a routine, unannounced inspection. The licensee operates a program utilizing six Cs-137/Am-241 portable gauge devices. The licensee has six authorized users. The inspector reviewed the regional based records systems and determined that no incidents or events had occurred since the last inspection period. The licensee was not using portables in NRC jurisdiction during the week of the inspection. The licensee uses the devices each week day, but most of their work is in Ohio and Pennsylvania. They use the devices in West Virginia multiple times per month.

A tour of the facility by the inspector determined that the storage location was appropriate for their licensed devices. The inspector interviewed one authorized user and found him to be knowledgeable of the licensee's Operating and Emergency Procedures. The inspector performed surveys in the unrestricted areas, and all measurements were below NRC regulatory allowable limits. Security was appropriate and in compliance with applicable requirements. Access control is limited only to authorized users. The inspector observed that the appropriate NRC forms and warning signs were posted and plainly visible. The inspector reviewed, in conjunction with discussions with the Site RSO, records including leak test records, dosimetry records, inventory records, calibration records, use logs, transportation documents, and training records. The records were all current, neat, easily retrievable, and complete.

The inspector did not observe a temporary job site location. An authorized user demonstrated transportation methodology. The inspector determined that the licensee met all transportation requirements to include security, documentation, and packaging. The inspector interviewed the authorized user and determined that he was knowledgeable with respect to operating and emergency procedures.

The Site RSO is directly involved in the operations of the radiation safety program and has performed a detailed review of the radiation safety program annually.

No violations were identified during this inspection.
