RE: Control Number 594520

Ms. Gryglak:

The Center for Diagnostic Imaging would like to amend its Byproduct Materials License Number 13-32194-01, to add Shamit Sarangi, M.D. as an Authorized User of materials licensed under 10 CFR 35.100, 35.200, 35.392, and 35.394. Dr. Sarangi was previously listed as an Authorized User of materials licensed under (equivalent of) 35.100 and 35.200 on a State of Florida Radioactive Materials License, a copy of which was previously submitted. In addition, we have previously submitted NRC Form 313A(AUT) documenting his training and clinical case experience of materials licensed under 35.392 and 35.394. In accordance with 10 CFR 35.59, we have previously submitted additional continued education documentation since his initial classroom training was obtained more than seven years ago. He has acquired additional supervised work experience at the Center for Diagnostic Imaging under the supervision of Shane Rose, M.D. The supervised work experience was pertinent to the use of sodium iodide-131 and included 1. Ordering, receiving, and unpacking radioactive materials and performing radiation surveys, 2. Performing quality control procedures on instruments used to determine the activity of dosages and performing checks for proper operation of survey meters, 3. Calculating, measuring, and safely preparing patient dosages, 4. Using administrative controls to prevent a medical event involving the use of unsealed byproduct material, and 5. Using procedures to contain spilled byproduct material safely and using proper decontamination procedures. The additional supervised work experience was provided from 9/29/16 to 5/30/17 and totaled 5 hours.

If there are any questions concerning this license amendment, please contact our nuclear medicine physicist, Mr. Patrick J. Byrne, D.A.B.R., C.H.P. at 877-317-5811.

Sincerely,

Andrea Carpenter, C.N.M.T., R.T.(N)  
Radiation Safety Officer
