

**FEMA**

JUN 6 2017

Kriss M. Kennedy  
Regional Administrator  
U.S. Nuclear Regulatory Commission  
Region IV Office  
1600 East Lamar Boulevard  
Arlington, Texas 76011-4511

Dear Mr. Kennedy:

I am forwarding a copy of the final After Action Report (AAR) for the Diablo Canyon Power Plant (DCPP) Medical Service Exercise (MS-1), conducted on March 29, 2017, by the County of San Luis Obispo Sheriff's Watch Center, San Luis Ambulance, and French Hospital Medical Center. The Department of Homeland Security's Federal Emergency Management Agency (FEMA) Region IX evaluated the MS-1.

The purpose of the MS-1 was to assess the level of local preparedness in responding to a radiological event occurring at, or within the vicinity of DCPP. The final AAR was prepared in coordination with the DCPP Off-site Response Organizations (ORO).

No Level 1, Level 2 Findings or Plan Issues were identified during the March 29, 2017, MS-1.

Based on FEMA's evaluation of demonstrated criteria for the March 29, 2017, MS-1, the capabilities of the affected OROs are adequate to provide continued reasonable assurance that appropriate measures can be taken to protect the health and safety of the public in the event of a radiological emergency at DCPP.

Therefore, the Code of Federal Regulations, Title 44 § 350 approval of the Off-site radiological emergency response plans and preparedness for the state of California and the affected OROs site-specific to DCPP, will remain in effect.

Mr. Kriss M. Kennedy
