SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 11-29358-01

A Licensee representative informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated April 5, 2017, had that all business activities under this material license ceased on December 31, 2014 and that the mobile coaches were now operating in Oregon and Washington only.

The supporting documentation to the NRC Form 314 stated that the licensee only possessed radioactive materials with radioactive decay half-lives of less than 120 days. A review of the historical file supported that only short lived radioactive materials were possessed by the licensee. The staff has also reviewed the statements made in NRC Form 314 and the results of the 2016 NRC inspection. Based on the documentation submitted and a review of your historical file, the staff concluded no further remediation or actions with respect to NRC regulated material is required.

Please find the enclosed License No. 11-29358-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1590 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/

Michelle Simmons, Health Physicist
Nuclear Materials Safety Branch B

Docket: 03038104
