On June 14, 2017, at 7:00 p.m., the U.S. Nuclear Regulatory Commission (NRC) conducted a public meeting at the Doubletree by Hilton in Tarrytown, New York, to discuss its assessment of the safety performance at Indian Point Units 2 and 3 for calendar year 2016.

A notice of the meeting was issued on May 18, 2017, and was posted on the NRC's external (public) Web page. The meeting notice can be found in the NRC's Agencywide Documents Access and Management System (ADAMS) with Accession Number ML17138A339. The NRC also presented slides on two topics of public interest, which included the assessment of degraded baffle-former bolts at Unit 3 and decommissioning. Following the discussion of plant performance and presentations, the NRC held a question and answer session.

Members of the public, local officials, State officials, and members of the media attended the meeting and were offered the opportunity to question the NRC regarding Entergy's performance and the role of the agency in ensuring safe plant operations.
