Draft Certificate of Compliance Review

SUMMARY

At approximately 10:15 A.M. eastern standard time on June 22, at the request of Chris Allen, Croft Associates Limited called to discuss a draft of revision 2 to certificate of compliance 9338. The draft of revision 2 to certificate of compliance 9338 not only documented changes to the certificate which would result due to Croft's amendment application dated December 14, 2015 as well as a condition imposed by NRC staff to replace O-rings for the new design insert Design No. 3987 prior to each shipment of radioactive Iodine 131. Croft had no comments on the draft of revision 2 to certificate of compliance 9338 and accepted the condition imposed by NRC staff. The call concluded after approximately five minutes.
