Subject: Dresden Station Unit 3
Commitment dates referencing
refueling outage schedule
NRC Docket No. 50-249

Dear Sir:

In the past, numerous commitments have been made in responses to NRC I.E. Bulletins and modification installation schedules which reference the Dresden Station Unit 3 refueling outages, specifically the Fall 1979 outage.

Due to extended down-time on Unit 3 to repair a damaged transformer, the current operating cycle has been revised and a 1979 refueling outage for Unit 3 is no longer scheduled. The refueling outage date has been revised to begin in March 1980.

Please note that all commitments and schedules to perform work during the Fall 1979 outage should now reference a Spring 1980 outage.

Also, note that the completion date for both Dresden Unit 2 and Dresden Unit 3 Fire Protection modifications should now reference the Spring 1980 Dresden 3 outage schedule. This commitment date appears in both the Dresden Unit 2 and Dresden Unit 3 licenses, DPR-19 and DPR-25, respectively, but no license amendments will be made unless it is specifically requested.

Please address any questions you may have concerning this matter to this office.

Very truly yours,

Robert F. Janecek
Nuclear Licensing Administrator
Boiling Water Reactors
