Mr. Darrell G. Eisenhut, Acting Director
Division of Operating Reactors
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: Dresden Station Unit 2
Systematic Evaluation Program
Seismic Review
NRC Docket No. 50-237

REFERENCE (a): D. G. Eisenhut letter to Cordell Reed
dated 6/21/79

Dear Mr. Eisenhut:

The following information is provided in response to the request for existing information in Enclosure 1 to Reference (a).

ITEM 1. The stress analysis for the reactor vessel support skirt is enclosed.

ITEM 2. We have had General Electric attempting to locate the reactor internals stress analysis since this information was informally requested in May. General Electric has indicated the analysis should be available by August 1.

ITEM 3. We have Sargent & Lundy Engineers attempting to locate the Turbing Building design computations for the junction of the turbine to reactor building. These will be transmitted to you when they become available.

ITEM 4. In response to this question, J. A. Blume has reevaluated the Reactor-Turbine Building junction. This reevaluation was sent to Lawrence Livermore Laboratory June 5, 1979, and a copy is enclosed.

Please address any questions you may have concerning this matter to this office.

Very truly yours,

Robert F. Janecek
