Downers Grove, Illinois 60515

July 17, 1991

Dr. Thomas E. Murley, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Document Control Desk

Subject: Dresden Nuclear Power Station Units 2 and 3
Inservice Testing Program (Revision 4)
for Pumps and Valves
NRC Docket Nos. 50-237 and 50-249

References: (a) B. Siegel (NRC) letter to T. Kovach (CECo),
dated July 25, 1990.

(b) M. Richter (CECo) letter to T. Murley (NRC),
dated February 13, 1991.

Dr. Murley:

Reference (a) transmitted the safety evaluation for Revision 3 of the Dresden Station (Units 2 and 3) Inservice Testing (IST) Program for pumps and valves. The IST Program was found acceptable for implementation provided the anomalies identified by the safety evaluation were corrected. Reference (b) provided Commonwealth Edison Company's (CECo) response to the anomalies, and indicated that a revision to the IST Program would be submitted.

Attachment 'A' of this letter provides Revision 4 of the Dresden Station (Units 2 and 3) IST Program for pumps and valves. This revision replaces in its entirety Revision 3 of the IST Program (dated July 1, 1989), and incorporates all of the changes required by the safety evaluation. Attachment 'B' provides a summary of the changes for Revision 4 of the Program.

Please contact this office should further information be required.

Respectfully,

Milton H. Richter

M.H. Richter
Nuclear Licensing Administrator
