Attachments: 49-50 NRC Amend Add Info 2.pdf

Ms. Cook, sorry for the confusion. Our original amendment application was to increase to two Model 3241-D gauges. Now that #562 has been disposed we will only possess one Model 3241-D gauge.

The only amendment needed on our license is to change the model to "D" and increase the total source in 8. C. to "not to exceed 110 millicuries per source".

Please see attached signed letter.

I greatly appreciate your prompt assistance.

Sam

Good Morning Mr. McLane: I've been given permission from my branch chief to move up your amendment request in my queue; therefore, I hope to issue it by next week or so.

However, I need a clarification, please. Is the amendment to add model 3241-C to the license or should model 3241-D be deleted? Although no longer in your possession, should you still have authorization for model 3241 (no C or D)?

Will you please submit your response to me in a signed and dated letter in pdf format when responding via email? It will be greatly appreciated.

Thank you in advance for your assistance in this matter.

Respectfully submitted,

Ms. Jacqueline "Jackie" D. Cook

Ms. Cook, please see attached. I am hopeful this minor change won't take much longer.

Let me know if you need anything from me.

Thanks again,

Sam
