**Importance:** High

---

Hi Andrea,

Hope you are well and enjoying the summer!

We are almost done with our technical evaluation of the off-site data.

Request clarification:  
For sample number 5.6.AR1.3, at depth 30-60"  
There is a data qualifier "Hh." Please define "Hh".

Also in the soil sampling summary it says that this location was not sampled, yet it seems to have been collected and analyzed because there is data in the table for this location with the "Hh" qualifier. Could you clarify?

Thank you

A
