Subject: Dresden Station Units 2 and 3 Supplemental Response to
Confirmatory Action Letter CAL-RIII-91-014,
NRC Docket Nos. 50-237 and 50-249

Reference: D. Galle letter to A. B. Davis dated December 6, 1991

Dear Mr. Davis:

The referenced letter was issued in response to CAL-RIII-91-014. The letter stated that replacement masts for the Unit 2 and Unit 3 refueling bridges were scheduled for installation in early 1992. The purpose of this letter is to provide an update on this replacement effort.

As of this date the replacement masts have not been installed. The replacement masts are on site and are awaiting the availability of the GE field representative and engineering evaluations. Our current schedule shows replacement by August 15, 1992. As a reiteration of the original CAL response, no fuel movements are expected to be necessary until the next scheduled refueling outage (D2R13). This outage is currently scheduled for January 6, 1993.

If there are any questions or comments regarding this information, please contact Denise Saccomando, Compliance Engineer, at 708/515-7285.

Respectfully,

P. L. Kovach for

T. J. Kovach
