**Subject:** [External\_Sender] Yucca Mountain in Nevada

I understand that you are seeking comments regarding the renewal of Yucca Mountain in Nevada. Our Nevada Section of the American Nuclear Society has an extensive list of speakers to help the public understand the issues from a logical, business, and technical perspective. We find overwhelming support from the general public when presented with the actual facts. Our organization is officially in favor of bringing back Yucca Mountain and to progress to reprocessing of spent nuclear fuel.

Therefore, I encourage you to continue the efforts to renew the Yucca Mountain project and please understand that our congressional representatives' opposition does not represent the general opinion of the people of Nevada, especially if they have been afforded some explanation of the subject and can perceive a personal benefit.

Thanks for your efforts in this area

Steven Curtis
