50-254 and 50-265  
50-373 and 50-374

References: 1) D.J. Chrzanowski letter to U.S. NRC dated April 6, 1992  
2) G.C. Wright letter to Cordell Reed dated May 13, 1992

This letter of reference (1) provided Revision 62 to the Commonwealth Edison (CECo) Quality Assurance Program for NRC review. The letter of reference (2) acknowledged NRC receipt for the Quality Assurance (QA) Topical Report and notified CECo that the review would require more than 60 days.

During the ongoing CECo restructuring of the Nuclear Operation Division, the responsibilities for the overall operation of the Nuclear Division have been delegated to the Chief Nuclear Officer, Mr. Cordell Reed. The Chief Nuclear Officer is the senior individual responsible for the overall operations of the Nuclear Operation Division and will report directly to the Chief Executive Officer.

Also, six Site Vice Presidents will be created who will report to the Chief Nuclear Operating Officer, Mr. Mike Wallace. Mr. Wallace will be totally responsible and accountable for operations and management of all six CECo Nuclear Stations.

Effective August 1, 1992, the Manager of Quality Assurance/Nuclear Safety (QA/NS) will report to Mr. Reed. The QA/NS department will continue to assure quality and maintain the Company's compliance with regulatory obligations and commitments. This new reporting arrangement preserves the independence of the Quality Assurance department from production and is consistent with the current CECo QA Topical Report (CE-1-A), Revision 61 dated August 31, 1991.

July 30, 1992

In light of the recent and impending significant organizational changes, CECo is requesting to withdraw Revision 62 to the Quality Assurance manual from NRC review at the present time. CECo is also requesting that the Topical Report Rewrite Comparison, provided to Region III, be returned for updating. The Topical Report will be updated and resubmitted to the NRC in the early part of 1993.

If you or your staff has any questions or comments regarding this transmittal, please refer them to this office.

Sincerely,

T.J. Kovach  
Nuclear Licensing Manager
