Dr. T.E. Murley, Director
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Document Control Desk

Subject: Completion Letter for NRC TAC Items Regarding Generic Letter 89-08,
"Erosion/Corrosion-Induced Pipe Wall Thinning."

Dresden Station, NRC Docket Nos. 50-237/249
Quad Cities Station, NRC Docket Nos. 50-254/265
Zion Station, NRC Docket Nos. 50-295/304
LaSalle County Station, NRC Docket Nos. 50-373/374
Byron Station, NRC Docket Nos. 50-454/455
Braidwood Station, NRC Docket Nos. 50-456/457

NRC TAC Items M73479/480, M73529/530, M73566/567, M73499/500,
M73462/463, and M73455/456.

Reference: CECo letter, M.H. Richter, to NRC, Dr. T.E. Murley dated
July 21, 1989.

Generic Letter 89-08 requested that addresses confirm that procedures or administrative controls for a long-term erosion/corrosion monitoring program have been or will be implemented. This program is to assure that the structural integrity of high energy (single-phase and two-phase) carbon steel piping systems is maintained. The referenced letter provided Commonwealth Edison's commitment to conform to corporate guidelines and to implement site specific procedures at each of the six stations.

The purpose of this letter is to notify the NRC that the actions committed to by Commonwealth Edison (CECo) in response to Generic Letter 89-08 have been completed for CECo's six nuclear stations. Those actions include 1) conformance to the corporate guidance, "Guidelines for the preparation of Single-Phase and Two-Phase Erosion/Corrosion Inspection Programs" and 2) the implementation of site specific procedures for a long term erosion/corrosion monitoring program at each of the six stations.
