Emergency Preparedness Requirements for Small Modular Reactors

Comment On: NRC-2015-0225-0002

Emergency Preparedness for Small Modular Reactors and Other New Technologies: Draft Regulatory Basis for Comment

Document: NRC-2015-0225-DRAFT-0027

Comment on FR Doc # 2017-07502

Submitter Information

Name: Eric Krage

General Comment

I believe the NuScale design implementation in Idaho, is a proof of concept development, that will ultimately positively impact the world by providing reliable power to everyone at an affordable cost with a low carbon footprint. I think the reduction in the safety zone is warranted due to the design. However, as an initial proof of concept it may be best to allow for a compromise between current reactor siting regulations and the NuScale proposal.
