To Whom It May Concern:

Enclosed is the After Action Report/Improvement Plan for the Three Mile Island (TMI) Nuclear Generating Station Plume Exercise for the Commonwealth of Pennsylvania that was held on April 11, 2017.

There were no Level 1 Findings, one Level 2 Finding, and two Planning Issues identified during the exercise. The Level 2 Finding; Issue No: 64-17-3a1-L2-01 was successfully be re-demonstrated on April 11, 2017 during the exercise. In addition, there were no outstanding Performance or Planning Issues from previous exercises.

Based on the results of the exercise and a review of the offsite radiological emergency response plans and procedures submitted, FEMA Region III has determined they are adequate (meet the planning and preparedness standards of NUREG-0654/FEMA-REP-1, Revision 1, November 1980, as referenced in 44 CFR 350.5) and there is reasonable assurance they can be implemented, as demonstrated during this exercise.

If you have any questions, please contact Thomas Scardino at (215) 931-5546.

Sincerely,

Robert Welch  
Acting Regional Administrator
