United States Nuclear Regulatory Commission
Washington, DC 20555

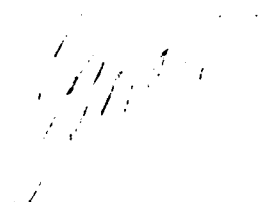

Re: Peach Bottom Atomic Power Station Unit No. 1
Docket No. 50-171

Dear Mr. Rusche:

On August 29, 1974, Philadelphia Electric Company filed with the Commission an Application for Amendment of Provisional Operating License DPR-12 for Peach Bottom Atomic Power Station Unit No. 1. This application requested, inter alia, that effective upon removal of the fuel from the reactor, the license be amended to authorize possession only of the Peach Bottom No. 1 facility.

This is to inform you that the decommissioning of Peach Bottom Unit No. 1 has progressed to the point where all fuel has been removed from the reactor and placed in the Unit No. 1 spent fuel pool. This was accomplished on June 11, 1975.

Very truly yours,

MASTER
