**Date:** Tuesday, June 27, 2017 7:04:39 PM

---

The Emergency Planning Rule should be the same for NuScale as any other nuclear reactor. NuScale reactors have no proven track record and the 12 reactors at INL will add up to a large facility which will sit over a VERY LARGE aquifer with the same major fault line running through INL. You have no doubt heard by this time of the swarm of earthquakes in Yellowstone which may presage a major eruption. Watering down safety rules should not be considered. Your job is to protect public safety and health, not industry profit margins. Thank you for your attention to these concerns David Monsees Boise, ID 83702
