**Subject:** NRC License Termination - Additional Information Requested

Hello Mr. Dietz,

Thank you for taking the time to speak with me this morning. As we discussed, please provide additional information to confirm that the facility is free of any potential contamination. This may be done by providing either a copy of the most recent leak test for the gauge, or a radiation survey of the facility that confirms no contamination is present. Additional information as to what is required may be found in Section C of the attached NRC Form 314; the information required for Sections A and B has already been provided in your initial termination request.

Additionally, please provide a signed and dated statement that Lawson-Fisher Associates P.C. has **never** possessed additional gauges other than the Troxler 3440 gauge listed in the termination request and transfer records. If other gauges have been possessed previously and disposed of at an earlier time, please provide records of their transfer as well as a copy of the most recent leak test for the device.

Please feel free to contact me at 630-829-9712 or via email with any questions.

Thank you,  
Laura Cender
