## General Comment

My husband and I are senior citizens and the parents of a son who had thyroid cancer and received RAI. He wanted to stay with us during his RAI treatment, but we are not in perfect health and were worried about the effects of exposure to the radiation, so we said no. That was two years ago, and our son has not talked to us since. It has been a very unfortunate situation that need never have happened, if only he had been allowed to stay in a hospital during his RAI treatment. Patients need to be treated with radioactivity in a hospital setting.
