

December 5, 1992

Docket Nos. 50-237
and 50-249

Mr. Thomas J. Kovach
Nuclear Licensing Manager
Commonwealth Edison Company-Suite 300
OPUS West III
1400 OPUS Place
Downers Grove, Illinois 60515

Dear Mr. Kovach:

SUBJECT: GENERIC ISSUES 48, "LCOs FOR CLASS 1E VITAL INSTRUMENT BUSES" AND
49, "INTERLOCKS AND LCOs FOR CLASS 1E TIE BREAKERS" (GENERIC LETTER
91-11) (TAC NOS. M82406 AND M82407)

Your response to Generic Letter (GL) 91-11, dated January 24, 1992, stated that the equipment identified in the GL was lacking the necessary procedural controls. In your letter dated November 4, 1992, you identified the actions implemented to meet the requirements of GL 91-11. The staff has reviewed these corrective actions and determined that the revision or establishment of limiting conditions for operation and surveillance requirements into your Dresden Technical Administrative Requirements administrative control system, as stated in your November response, meets the requirements of GL 91-11 and is, therefore, acceptable.

This letter closes our review of this issue and the corresponding TAC'S.

Sincerely,

Original Signed By:

Byron L. Siegel, Project Manager
Project Directorate III-2
Division of Reactor Projects - III/IV/V
Office of Nuclear Reactor Regulation
