Dear Dr. Murley:

A conference call was held on March 3, 1992 between representatives of Commonwealth Edison (CECo) and the Nuclear Regulatory Commission (NRC). The purpose of the call was to discuss CECo's commitment to both the SQUG commitments and the implementation guidance as defined in the Generic Implementation Procedure (GIP-2). CECo is committed to both the implementation guidance and SQUG commitments in their entirety including the clarifications, interpretations and exceptions identified in the SSER-2 with the understanding that any deviations from the GIP will be performed as outlined Part I, Section 1.3 of the GIP.
