Dear Mr. Farrar:

SUBJECT: RESPONSE TO GENERIC LETTER 91-11, "RESOLUTION OF GENERIC ISSUE 48, 'LCOs FOR CLASS 1E VITAL INSTRUMENT BUSES,' AND 49, 'INTERLOCKS AND LCOs FOR CLASS 1E TIE BREAKERS,' PURSUANT TO 10 CFR 50.54(f)" FOR DRESDEN, UNITS 2 AND 3 (TAC NOS. M82406 AND M82407)

On July 18, 1991, the NRC issued Generic Letter (GL) 91-11 which contained the staff resolution of Generic Issues 48 and 49. The GL required that licensees certify that procedures exist which contain time limitations and surveillance requirements for vital instrument buses (VIB), inverters, or other onsite power sources for VIB and tie breakers. If procedures do not exist, a justification demonstrating the reasons why the controls are not needed is required.

By letters dated January 24, 1992, and November 4, 1992, you responded to the GL. You indicated that procedures for time limitations and surveillance requirements are in place at Dresden, Units 2 and 3.

The NRC staff has reviewed your responses and find they meet the reporting requirements set forth in GL 91-11. This completes the staff's activities on TAC Nos. M82406 and M82407.

Sincerely,

Original Signed By:

John F. Stang, Project Manager
