Subject: RE: Notification Reports to NRC

TJ,

I hit send too fast - 2 administrative details I notice on the letters and will pass on comments about:

-The license you referenced as "NRC 1288-19" does not appear to be an NRC license, and Teresa Estrella at General Nucleonics confirms that is a State of California materials license. It is a valid CA license according to Terry.

-The letter regarding the transfer from Elizabeth City, NC says the transfer was received at GN on Aug 25, 2015, which should have shown 2014.

Subject: Notification Reports to NRC

Hector/Todd

Attached are the Notification Reports, as required by 10 C.F.R. 31.5, for the transfer of:

- a) 3 IBIS devices from New England Air Museum and
- b) 9 IBIS devices from USCG BASE Elizabeth City.

Please let me know if you need any more information in connection with these transfers. I will be contacting you soon to set up an informal meeting between CG and NRC in which we can further discuss our way forward.

I very much appreciate all the advice and support you've both provided in helping us get this effort moving.
