Vice President, Nuclear Oversight  
and Regulatory Services  
Executive Towers West III  
1400 Opus Place, Suite 300  
Downers Grove, IL 60515

Dear Mr. DelGeorge,

SUBJECT: MEETING WITH THE RADIATION PROTECTION MANAGERS OF DRESDEN,  
LASALLE, AND QUAD CITIES STATIONS

This refers to a meeting on March 3, 1994, between C. D. Pederson and other members of the NRC staff and the Radiation Protection Managers (RPMs) of your Dresden, LaSalle, and Quad Cities facilities. This meeting was held as a followup to an initial meeting held on October 18, 1993, to continue discussions on poor radiation program performance and management involvement with station radiation protection programs at each of these three plants.

Enclosed is the inspection report summarizing the meeting and a copy of the meeting agenda.

The meeting involved candid discussions of each plant's challenges and involvement by each station's newly appointed Technical Services Superintendent. We appreciate the participation of the Commonwealth Edison personnel and find these meetings quite valuable in collectively understanding the course of action each plant is taking to address our concerns with their radiation protection programs. As discussed at the meeting, many of the problems identified by Region III have been mainly due to a lack of active involvement by senior managers with each station's radiation protection program. We strongly urge you to ensure that senior management play an active role in the radiation protection programs.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this and the enclosure will be placed in the NRC Public Document Room.
