

Public IEO1

MAY 02 1994

Docket Nos. 50-237; 50-249
License Nos. DPR-19; DPR-25

Commonwealth Edison Company
ATTN: Mr. M. Lyster
Site Vice President
Dresden Station
6500 North Dresden Road
Morris, IL 60450

SUBJECT: NOTICE OF VIOLATION (NRC INSPECTION REPORT NOS. 237/94005;
249/94005)

Dear Mr. Lyster:

This refers to the inspection conducted by M. Leach, A. M. Stone, C. Phillips, and D. Chyu of this office on February 23 through April 11, 1994. The inspection included a review of activities authorized for your Dresden Nuclear Station, Units 2 and 3. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements.

A significant problem identified in the report is the continuing failure of some supervisors to implement management's expectations in such areas as radiological practices and work package documentation. Management's failure to correct this issue is a weakness. Your actions to improve supervisor performance will be one of the subjects at our next management meeting.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violation was cited for failure to maintain control of locked valves on certain safety related systems. The violation is of concern because positive control of certain system components is essential to safe operation.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this

Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

The responses directed by this letter and the enclosed Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. No. 96.511.

Sincerely,

Edward G. Greenman, Director
Division of Reactor Projects
