Mr. T. Joyce, Site Vice President  
Dresden Station  
Commonwealth Edison Company  
6500 North Dresden Road  
Morris, IL 60450

SUBJECT: SEMI-ANNUAL INSPECTION PLAN FOR DRESDEN

Dear Mr. Joyce:

The NRC Region III office performs periodic Plant Performance Reviews (PPR) for the purposes of assessing licensee performance and developing facility inspection plans. The purpose of this letter is to notify you of the results of the inspection planning portion of our March 1995 PPR for the Dresden Station. The intent of this effort is to help facilitate your resource planning as it relates to our inspection activities. In the future, we will make approximate semi-annual notifications of our inspection plans to each Region III holder of a Part 50 power reactor license.

The enclosure to this letter provides the schedule for NRC inspections of the Dresden Station which are planned for the next several months. The plan is subject to change should circumstances dictate. These could include inspection in one technical area pointing to a need to perform inspection or followup in another area, or reactive inspections in response to events. We will inform you of any required changes to the schedule. Periodic visits by the Reactor Operations Assessment Representative (ROAR), the Lead for Engineering Assessment Program (LEAP), and Reactor and Project Engineers are considered a part of the routine resident inspection.

We are interested in feedback on this plan, and any concerns you may have about its potential impact. If you have any questions or concerns regarding this plan, please contact me at (708) 829-9603.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

Sincerely,  
Original Signed by W. L. Axelson  
W. L. Axelson, Director  
Division of Reactor Projects

## Enclosure

INSPECTION PLAN

NRC Inspection Program Mandatory Inspections ("core" inspections) are conducted at all plants. The resident inspector staff will conduct the following core inspections at Dresden in the next 6 months:

Operational safety areas will be inspected on an ongoing basis pursuant to NRC Inspection Procedure 71707.

Maintenance and testing activities will be inspected on an ongoing basis pursuant to NRC Inspection Procedures 62703, and 61726.

Engineering activities may be inspected at any time pursuant to NRC Inspection Procedure 37551.

Plant support activities (radiation protection, security, emergency planning, fire protection, ....) may be inspected at any time pursuant to NRC Inspection Procedure 71750.

**Planned NRC Regional Initiative (RI) Inspections through November 30, 1995**

IP - NRC Inspection Procedure

OPS - Operations
