

September 12, 1995

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555

Subject: Dresden Nuclear Power Station Unit 2  
Core Spray Flaw Evaluations  
NRC Docket No. 50-237

Reference: J. Stang letter to D. Farrar, dated July 26, 1995.

The purpose of this letter is to provide to the NRC staff ComEd's evaluations of the core spray flaws observed at Dresden Unit 2, during the current refueling outage (D2R14), as requested in the referenced letter. Attachment A provides the Integrated Evaluation Report of the Core Spray Flaws Attachment B provides the Core Spray Flaw Evaluation Report. These evaluations concluded that sufficient margin exists to operate for one cycle with the identified flaws. It should be noted that this submittal does not contain any proprietary information.

To the best of my knowledge and belief, the statements contained in this response are true and correct. In some respects, these statements are not based on my personal knowledge, but obtained information furnished by other ComEd employees, contractor employees, and consultants. Such information has been reviewed in accordance with company practice, and I believe it to be reliable.

If there are any questions regarding this submittal, please contact this office.

Sincerely,

Peter L. Piet  
Nuclear Licensing Administrator
