Mr. Crosslin,

I am a Senior Project manager in the NRC Division of Operating Reactor Licensing and I am managing the review of the November 23, 2016, Watts Bar Unit 2 licensing amendment request to extend intervals for certain surveillance requirements (CAC No. MF8895). The licensee's submittal is available in ADAMS under Accession No. ML16333A250. The NRC is finalizing the second related license amendment and, Per 10 CFR 50.91(b), 10 CFR 50.91(b)(3) and (b)(4), I am notifying you of the proposed issuance.

A portion of the proposed surveillance requirement extensions from the licensee's November 23, 2016, submittal were evaluated in the March 29, 2017, Amendment (No. 10) to Watts Bar Nuclear Plant, Unit 2 Facility Operating License No. NPF-96. This amendment is available in ADAMS under Accession No. ML17074A501.

The amendment(s) were noticed in the Federal Register on January 17, 2017 (82 FR 4932). See the attachment to this email. No public comments were received.

Please respond to me by June 30, 2017, to provide any comments regarding this license amendment. Please contact me by e-mail or at (301)415-1383 if you have any questions or comments.

Thanks,

Perry Buckberg
