Subject: Dresden Nuclear Power Station Unit 2 Cycle 15 Test Report
NRC Docket No. 50-237

Enclosed please find the Dresden Unit 2 Cycle 15 Startup Test Report. Technical Specifications 6.6.A.1 requires a submittal of the Startup Test Report to the NRC within 90 days following resumption of commercial power operation. The 90 day period will be over on July 23, 1996. Due to various problems during unit 2 startup, full power operation has not been obtained as of July 12, 1996. Thus the TIP System Symmetry and Total Uncertainty has not been completed, but will be transmitted as soon as possible after reaching full power or within at least 90 days of this report.

Please direct any questions or comments regarding this change to C. de la Hoz, Dresden Reactor Engineer, (815) 942-2920, extension 2997.

Very truly yours,

A handwritten signature in black ink, appearing to read "J. Stephen Perry".

J. Stephen Perry
