U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, D. C. 20555

Subject: Dresden Nuclear Power Stations Units 2 and 3
Notification of Implementation of Technical Specification Amendments
150 and 145 for Semi-Annual Effluent Report required by Sec 6.0
NRC Docket Nos. 50-237 and 50-249

Reference: R.M. Pulsifer (USNRC) to D.L. Farrar (ComEd) SER dated
June 28, 1996.

In the Referenced letter, (NRC) Staff provided final approval of the Technical Specification Upgrade Program (TSUP) for Dresden Station. Within those amendments, the (NRC) Staff approved the change in the schedular requirements for the submittal of the Effluent Release Report required by 10CFR50.36a(2). Dresden previously submitted this report on a semi-annual basis in accordance with pre-TSUP Technical Specifications 6.6.C.1. The TSUP amendment allows the submittal of the Effluent Release Report on an annual bases in accordance with TSUP Section 6.9.A.4. ComEd is implementing Section 6.9.A.4 to eliminate the submittal of a report that is no longer required by the regulations. Please direct any questions to F. Spangenberg, Regulatory Assurance Manager, (815) 942-2920, extension 3800.

Sincerely,

J. Stephen Perry
Site Vice President
Dresden Station
