

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

September 19, 1996

MEMORANDUM TO: Samuel J. Collins, Deputy Regional Administrator, RIV

FROM: James M. Taylor *James M. Taylor*
Executive Director for Operations

SUBJECT: INDEPENDENT SAFETY INSPECTION (ISI) OF THE DRESDEN NUCLEAR
POWER STATION

I have reviewed the revised ISI inspection plan outline, dated September 17, 1996, and have approved it for use during the conduct of the ISI at the Dresden Nuclear Power Station. Notwithstanding these confirmed plans, the ISI team should remain flexible and receptive to new approaches and information. In consultation with me, you should be prepared to modify the plan, as necessary, to more effectively react to developing issues.

Keep me apprised of the status of the development of the inspection plan outline relative to the sustained observation of work activities during the upcoming Dresden, Unit 3 refueling outage. Once you have developed the inspection plan outline for this inspection effort, it should be submitted to me for approval.

Following the onsite inspection activities, the ISI team will prepare an inspection report for submittal to me. It is essential that this report be issued in accordance with the established schedule so that the inspection findings and conclusions can be considered during the January 1997 Senior Management Meeting.
