JSPLTR #96-0243

U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, D. C. 20555

Subject: Dresden Nuclear Power Stations Units 2 and 3
Notification of Implementation of Technical Specification
Amendments 150 and 145 for Technical Specification 3.7.K.1
"Suppression Chamber."
NRC Docket Nos. 50-237 and 50-249

Reference: R.M. Pulsifer (USNRC) to D.L. Farrar (ComEd) SER dated
June 28, 1996.

By this letter ComEd informs the NRC of intent to implement section 3.7.K.1 of the
Technical Specification Upgrade Program for Dresden Station.

In the referenced letter, (NRC) Staff provided final approval of the Technical
Specification Upgrade Program (TSUP) for Dresden Station. Within those
amendments, the NRC approved the removal of the maximum and minimum
suppression pool water volumes of Technical Specification 3.7.A.1.a and b. The NRC,
in Technical specification 3.7.K.1, further approved control of the suppression pool
water level as measured from the bottom of the torus suppression pool. ComEd is
implementing amendments 145 and 150 to resolve any conflict or question of the
accuracy of the values previously used in TS 3.7.A.1.a and b. ComEd will implement
section 3.7.K.1 prior to start-up of Unit 3.
