JSPLTR #97-0094

U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, D.C. 20555

Enclosed is Licensee Event Report 97-008, Docket 50-237, which is being submitted in accordance with 10CFR50.73(a)(2)(v), which requires the reporting of any event or condition that alone could have prevented the fulfillment of a safety function of structures or systems that are needed to: a) shutdown the reactor and maintain it in a safe shutdown condition, b) remove residual heat, c) control the release of radioactive material, or d) mitigate the consequences of an accident. In addition, it is being submitted in accordance with 10CFR50.73(a)(2)(i)(a), completion of a nuclear plant shutdown required by the Plant's technical specifications.

This correspondence contains the following commitments:

1. Straps will be installed on Unit 3 breaker auxiliary switches on Busses 33, 34, and 71, prior to startup from the current refueling outage (D3R14). (2371809700801)
2. On April 11, 1997, Golden Gate Switchboard Company issued a Notification of Potential Defect under the Requirements of 10CFR21.21(b). The final report will be reviewed by ComEd to address a permanent repair to the auxiliary switch mounting. (2371809700802)
