Morris, IL 60450

SUBJECT: NRC EMERGENCY PREPAREDNESS INSPECTION REPORTS
50-237/97023(DRS); 50-249/97023(DRS)

Dear Mr. Perry:

On October 30, 1997, the NRC completed an inspection of your emergency preparedness program at the Dresden Nuclear Power Station, Units 2 and 3. The enclosed report presents the results of that inspection.

Areas examined within your emergency preparedness program are identified in the report. Within those areas, the inspection consisted of a selective examination of procedures and representative records, interviews with personnel, and observation of activities in progress. The objective of the inspection effort was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements.

During this inspection our observation of your activities showed the emergency preparedness program to be effectively implemented. In particular, the emergency response facilities, equipment, and supplies had been well maintained, management support to the program was currently strong, and key emergency response personnel demonstrated competent knowledge of responsibilities and emergency procedures. You effectively addressed and corrected a number of issues identified during a program audit and self assessment.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and enclosure will be placed in the NRC Public Document Room (PDR).

Sincerely,

Original Signed by John M. Jacobson (for)
John A. Grobe, Director
Division of Reactor Safety
