Downers Grove, IL 60515

SUBJECT: NRC RADIATION PROTECTION INSPECTION REPORTS
50-237/98004(DRS); 50-249/98004(DRS)

Dear Mr. Kingsley

On January 21, 1998, the NRC completed an inspection at your Dresden Generating Station, Units 2 and 3. The results of the inspection were discussed with Mr. Larry Aldrich and other members of your staff on January 21, 1998. The enclosed report presents the results of this inspection.

The purpose of the inspection was to review the unconditional material release program, and the effectiveness of the actions taken on previous open items and violations.

Overall, the unconditional material release program was comprehensive, technically sound and well implemented. Actions taken to prevent recurrence of previously identified violations, inspection follow-up items, and licensee event report items appeared effective.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
