Attn: Document Control Desk

Subject: Byron Station Units 1 and 2
Braidwood Station Units 1 and 2
Zion Station Units 1 and 2
Quad Cities Station Units 1 and 2
Dresden Station Units 2 and 3
LaSalle County Station Units 1 and 2
Fitness for Duty Reporting 10 CFR 26.71(d)
NRC Docket Nos. 50-454/455, 50-456/457, 50-295/304,
50-254/265, 50-237/249, 50-373/374

In accordance with 10 CFR 26.71(d), Commonwealth Edison Company is providing the compiled fitness-for-duty program performance data for each Station and the applicable Corporate support employees for the six month period ending December 31, 1997.

The attachment to this letter contains the performance data for Braidwood, Byron, Dresden, LaSalle, Quad Cities and Zion Stations, respectively. Also, included is the performance data for the corporate support personnel.

Please direct any questions regarding this matter to this office.

Respectfully,

David R. Helwig
Senior Vice President
Nuclear Generation Support

On November 1, 1990, CECO implemented a 50 ng/ml positive threshold for THC. In order to report test results for the USNRC specified level (100 ng/ml) and for ComEd's more stringent level of 50 ng/ml, the data is reported above as follows.

All Positive Tests at or above
Commonwealth Edison's Threshold -----

-----Positive Tests at
100 ng/ml or greater

Management Actions and Sanctions

Nineteen positive tests resulted in the denial or revocation of unescorted access of one licensee employee and sixteen short-term contractors. One refusal to test by a short-term contractor resulted in the denial and revocation of unescorted access.

Events Reported

On October 18, 1997, a short-term contractor was denied access after admitting violation of the 5-hour abstinence rule on October 10. Additionally, two other contractors involved in this event were denied access for failing to report the odor of alcohol to their supervisor.

Management Actions and Sanctions

There were no positive test results requiring action during this reporting period.

Four hundred fifty six (456) on-site tested negative quality control specimens were submitted to the SAMHSA laboratory during this period. 455 specimens were confirmed negative by the laboratory. One specimen confirmed positive at the laboratory following GC/MS testing. This specimen tested on-site at 98% of the positive threshold and was a valid negative. The on-site immunoassay test instrument was calibrated according to manufacturer's recommendations. A review of the seven other specimens tested during the run yielded no abnormalities. The Laboratory Forensic Testing Director was provided on-site screening information. She noted that when this specimen was tested on-site, it was not consistent with a true negative test, although it was just under the positive threshold. The Laboratory Director concluded the overall accuracy of the on-site specimen screening program is acceptable under instrument accuracy standards. The false negative test result may be attributed to variability of reagents and/or differences in on-site and laboratory test equipment.

Blind performance testing was conducted at a rate of ten percent. Thirty-eight (38) specimens were submitted to the laboratory. All results were reported correctly.

Seven (7) Fitness For Duty program violation appeals were received for this period. The ComEd Executive Review Board upheld all violation decisions.

Eighty-two (82) positive test results were confirmed positive by the Medical Review Officer. Additionally, four (4) positive specimens were reanalyzed and re-confirmed positive.

Events Reported

There were no 24-hour reportable events during the period.
