General Comment

I have received two treatments with RAI: once with 75 millicuries and once with 100 millicuries. Each time I was released to go home with specific instructions on how to separate myself from others in the family. I was never given any kind of warning about how this treatment might affect my health in other ways. Since these two RAI treatments, I have been diagnosed with lymphoma, and I often wonder if RAI played any role in developing lymphoma.
